

From zero to hero

# Infrastructure as Code

Daniel Hasselwander

ti&m

## Goals for this session

1. Understand how you should deploy infrastructure
2. Parts of a typical pipeline
3. Typical Pipeline in ADO

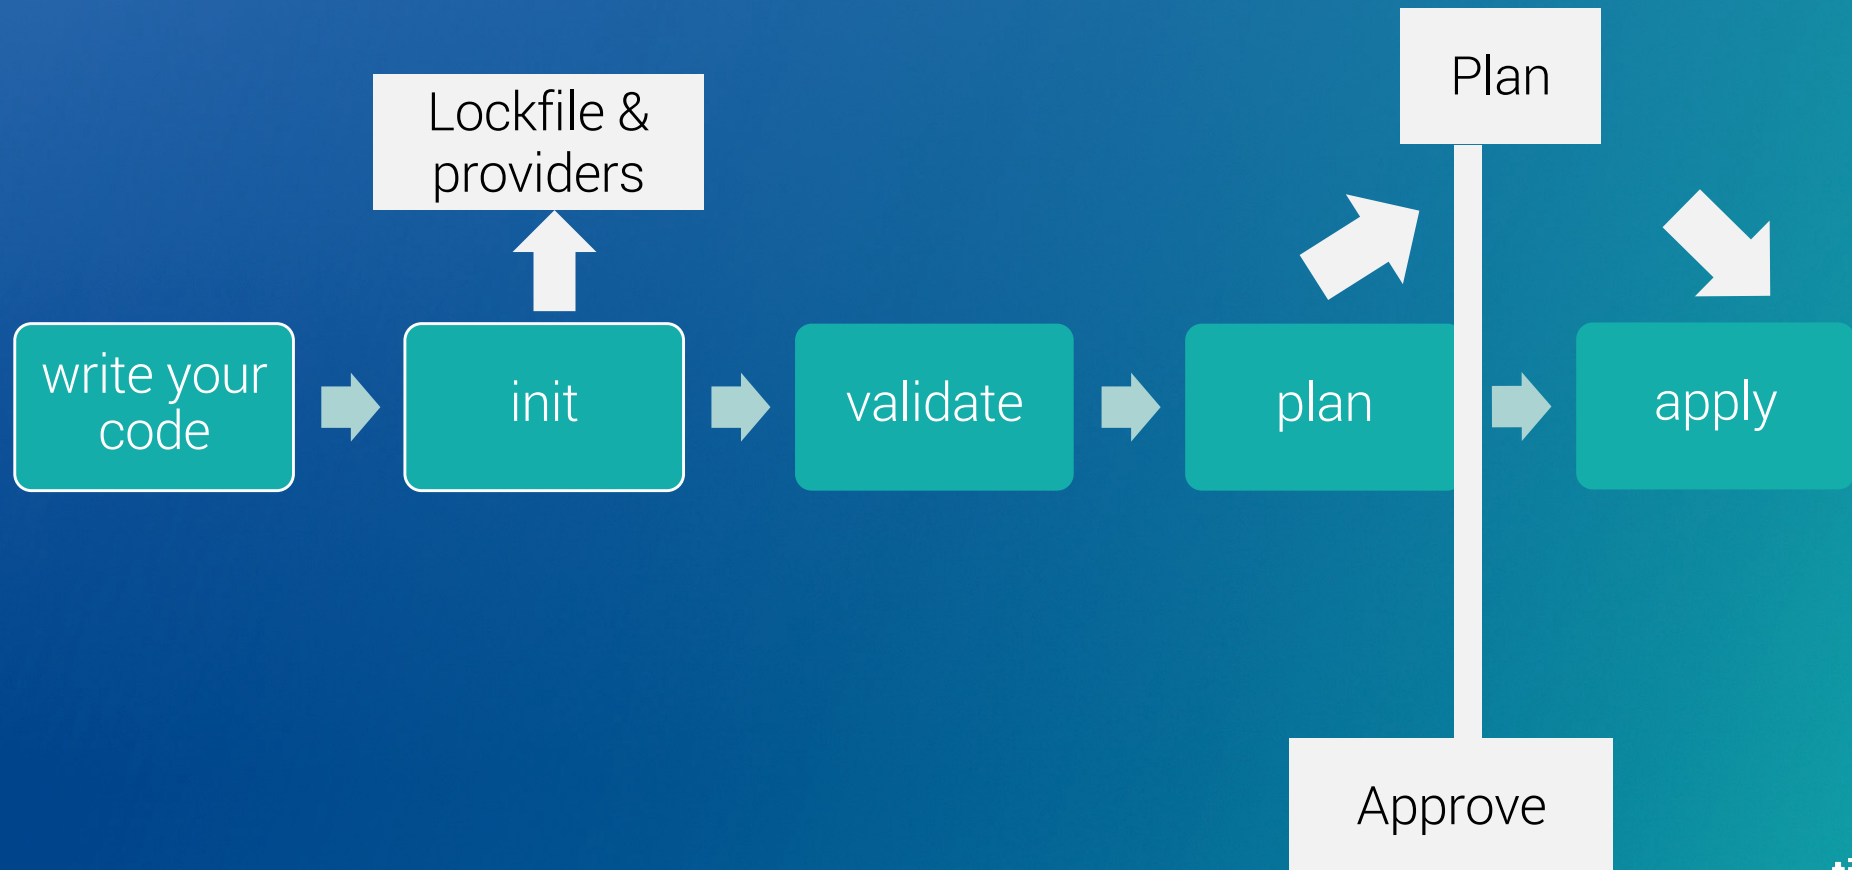

# How you should deploy

- Only main-branch should be deploy
- Create a Dev Environment
- Needs approve before apply

# How it works

# How it works

Terraform

# How a typical ado looks like

asset

Terraform

# GO TO AZURE DEVOPS
